Tools

As a group we have been given the task of creating a website that will display our "interests in IT, our understanding in IT technologies, what jobs we desire and an IT project idea which we will focus more on in the nex] assignment. We as a group decided to split the workload adequately so we each have an equal contribution for this task. To achieve this we first got into contact and set up a MS teams chat where we hosted several meetings where we discussed various topics, finalised any decisions and came to an understanding with one another so that no one was lost. We then proceeded to construct a table so that everyone knew what they were assigned. Such as…

IT - A2 Group contribution

Group Name:

Members:

	IT Technology Topics
Aaron	Language Processing & Chatterbots
James	Clouds, Service, Servers
Anish	Autonomous Vehicles
Jacob	Raspberry Pi's / Small Computing devices.

IT work (15 marks) = Aaron

Project idea (15 marks) = James
Medical app that offers advice relating to user's health/medical issues/fitness

Industry data (10 marks) + Team profile (5 marks) = Jacob

Presentation (10 marks) + Tools (5 marks) = Anish

Link of the website

Link of the github repo

How does the github repo reflects our work as a group

The github repo reflects our combined efforts, as each person was equality assigned a task and has successfully accomplished them. Especially the meetings where we elaborated on the allocation work and the compilation of the website where all the information would have to come together.

Link team meetings

Meeting1
26 March 2021 20:30 - 21:30

The agenda
